

Project management according to IPMA

Course code: IPMA

Stand out in project management and achieve the prestigious international IPMA® certification with this comprehensive course. Designed to fully prepare you for the certification exam, this intensive program also equips you with practical skills crucial for success in real-world project management. In addition to providing essential technical expertise, the course emphasizes the development of key soft skills required for effective project leadership. Upon completion, you will be thoroughly prepared for both the exam and a simulation workshop, paving the way for you to earn the globally recognized IPMA® certification—a critical milestone for advancing your career.

Who is the course for

For anyone seeking to prepare for the international IPMA® certification and enhance their competencies in project management.

What we teach you

In the IPMA certification preparation course, you will learn both fundamental and advanced project management techniques and methodologies. The course guides you through the entire project management process, from initiation and planning to execution, control, and closure. You will also focus on developing your behavioral skills, enabling you to communicate effectively not only with your project team but also with all other stakeholders. This course will fully prepare you for the IPMA certification exams, equipping you with comprehensive knowledge and practical skills essential for successful project management.

Required skills

No prior knowledge is required to take the course. However, specific professional experience is required for the certification itself:

Level D - No professional experience required.

Level C - In the last 6 years, independent project management or acting as an assistant to a project manager for a complex project, with a total effort of at least 300 person-days.

Level B - In the last 8 years, project management totaling at least 500 person-days, with at least 300 person-days involving complex projects.

Level A - In the last 12 years, managing complex or highly complex projects with a total effort of at least 500 person-days, of which at least 300 person-days were spent on very complex projects of strategic significance to the organization.

Study materials

The study materials will be available online in PDF format, including the International Project Management Standard according to IPMA ICB v.4.
