QRadar SOAR: Integration with Microsoft Active Directory

Course code: BQ440G

Gain hands-on experience with the IBM Security® QRadar® SOAR platform. Learn how to integrate with Active Directory by using the LDAP and Active Directory Function for SOAR app integration. Explore the actions which can be performed from the SOAR platform to respond to cases which users are involved.This course is designed and built on a QRadar SOAR stand-alone virtual machine (v50.1.54) with a complementary SOAR App Host (v1.14.1). However, the concepts that the course covers apply to all on-premises or SaaS versions of QRadar SOAR.

Who is the course for

- Security Operations Center (SOC) Analyst
- Security Analyst
- Incident Responder
- Managed Service Security Provider (MSSP)

What we teach you

- Gain hands-on experience with the SOAR console
- Integrate the LDAP and Active Directory Function for SOAR solution
- The actions that you can take on Active Directory from the SOAR platform

Skills you will gain:

- SOAR Software
- Playbooks
- Threat response

Required skills

- null

Course outline

- Section 1: Video of LDAP and Active Directory integration with QRadar SOAR
- Section 2: Lab
