

Mastering User Stories

Course code: BEABA

The Mastering User Stories course is ideal for those who are looking for ways to collaborate effectively in an agile environment. After completing this course, you will be better able to support your teams in delivering a product that meets the needs of your customers. The training is designed not only for business analysts, but also for all roles involved in transforming customer needs into a valuable product.

What we teach you

By completing this course, you will gain knowledge of the role of business analysis in Agile, what techniques you can use in an agile environment, and when to use them in product development. Using the transfer of experience from many years of practice of lecturers and practical examples, we will guide you through agile analysis techniques, including their effective use in the context of organization and product development.

Required skills

A prerequisite for this course is a basic knowledge of Agile and business analysis.
