Mobile Device Management - 42Gears SureMDM - Private training

Course code: MDM1

SureMDM is a Unified Endpoint Management (UEM) system for managing a wide range of operating systems and devices, including Android, Windows, iOS, ChromeOS, Linux, VR, and IoT. SureMDM enables remote application installation, device security and monitoring, and troubleshooting from a centralized web console. The system is used by companies of various sizes in over 115 countries worldwide.SureMDM offers a powerful set of features including Remote Support for remote device control and file access, SureLock to lock down corporate devices, SureFox for secure access to web applications, and SureVideo for controlled playback of videos and photos in kiosk mode.The course will also include hands-on exercises, covering device enrollment with Android OS into SureMDM management and practical demonstrations of all topics discussed.
