

Understanding Cisco Wireless Foundations

Course code: WLFNDU

The course gives students the knowledge and skills to position, plan, implement, operate and manage Cisco Wireless LAN (WLAN) network. Students learn how to design, install, configure, monitor and conduct troubleshooting tasks on Cisco WLAN. The course covers foundational knowledge of Designing Cisco Enterprise Wireless Networks and Implementing Cisco Enterprise Wireless Network.

What we teach you

- Wireless theory
- Wireless Security and client access
- Cisco Wireless network architecture
- Cisco Centralized wireless networks
- WLAN maintenance and troubleshooting

Required skills

General knowledge in networking and wireless networks, TCP/IP, routing and switching knowledge.

Teaching methods

Professional explanation with practical samples and examples.

Teaching materials

Cisco guide book for this course.
