

# Angular II: Advanced techniques

Course code: JS\_ANGULAR2

This course is designed for TypeScript programmers who want to deepen their knowledge of front-end application development using the Angular library. Participants will learn advanced data presentation and form creation techniques, as well as advanced component communication and dependency injection techniques. The course assumes knowledge of TypeScript at the course level [JS\_TS1] and knowledge of the Angular library at the course level [JS\_ANGULAR1].

## For whom the course is intended

- This course is designed for Angular application developers who want to deepen their knowledge of the platform to optimize performance and improve the architecture of their applications.

## What we will teach you

- Advanced data presentation techniques
- Advanced techniques for forms
- A detailed overview of the component and directive lifecycle
- Advanced component collaboration techniques
- Detailed operation of dependency injection

## Required Entry Level Knowledge

- Basic knowledge of algorithmization and programming at the level of the PRG course, or experience programming in another language.
- The course is not suitable for complete beginners who have never programmed in any programming language

## Course outline

### Advanced data presentation

- ng-template
- ng-container
- custom structural directives
- async pipe
- @defer blocks

### Advanced forms

- validation directives for template forms
- asynchronous validation
- dynamic behavior changes for reactive forms

### Component and directive lifecycles in detail

- ngDoCheck
- ngAfterContentInit
- ngAfterContentChecked
- ngAfterViewInit
- ngAfterViewChecked
- afterNextRender
- afterRender

### Hosting elements

- What is a guest element
- @HostBinding
- @HostListener
- collision

### Queries on child components

# Angular II: Advanced techniques

- Content queries
- Locators
- Static Queries

## Advanced directives

- Structural directives
- Host Directive
- Directive Composition

## Dependency injection

- Injection tokens in detail
- Hierarchy of injectors

## Optimization

- Signals
- Inputs as signals
- models
- queries
