

# Test Analysis in Practice

Course code: ATPTA

Enough theory! Learn how to handle Test Analysis in practice in just one day.

## What we teach you

This one-day workshop will teach you how to handle test analysis in reference to a software development lifecycle and documentation quality, how effectively estimate test analysis and test execution effort and how to prioritize correctly under time pressure. You will get know a bunch of tips and tricks from project praxis and you will try them in several individual and group exercises.

## Required skills

- At least a year of experience in test analysis
- ISTQB Foundation Level or a knowledge of basic test design techniques

## Course outline

- Repetition of basic techniques
- Work with practical examples
- Testing input combinations
- Testing input combinations
- Revision of basic techniques
- Tools used for combinatorial testing
