Distributing and managing content used for deployments
Deploying and managing Applications, Packages and Scripts
Maintaining software updates (Microsoft, 3rd party) for managed PCs
Implementing Endpoint Protection for managed PCs
Managing compliance and secure data access
Managing operating system deployment and ADK, DISM, PE
Managing and maintaining a Configuration Manager site

Preparation for Microsoft certification

Most Microsoft certification exams do not require students to attend an official MOC course in order to pass the exam.

This applies to all certifications except for MCM

Official Microsoft MOC courses as well as our own GOC courses are good ways of preparation for Microsoft certifications such as MCP, MTA, MCSA, MCSE or MCM

This does not mean that official MOC courses would serve as the only necessary preparation. The primary goal of an MOC course is to provide for sufficient theoretical knowledge and practical experience to effectively work with the related product

MOC courses usually cover most of the topics required by their respective certification exams, but often do not give every topic the same amount of time and emphasis as may be required to completely pass the exam
