

Exchange - implementation

Course code: GOC231

Five-days instructor-led training covers basics to details of Microsoft Exchange deployment, implementation and administration primarily of its on-prem environment but also touching some topics about hybrid integration with cloud based Microsoft 365 and Office 365 technologies.

Audience profile

This course is primarily intended for people aspiring to become enterprise-level messaging administrators for Exchange Server 2019. IT generalists and help-desk professionals who want to learn about Exchange Server 2019 might also take this course. Students taking this course are expected to have at least two years of experience working in the IT field—typically in the areas of Windows Server administration, network administration, help desk, or system administration. They are not expected to have experience with previous Exchange Server versions.

At course completion students will be able

Perform deployment and basic management of Exchange Server 2019.

Manage Exchange Server 2019.

Create and manage various recipient objects in Exchange Server 2019.

Use Exchange Management Shell to create and manage various recipient objects in Exchange Server 2019, and perform various tasks to automate Exchange management procedures.

Configure client connectivity to Exchange Server 2019, and manage Client Access services.

Implement and manage high availability.

Implement backup and disaster recovery for Exchange Server 2019.

Configure message transport options.

Configure message hygiene and security options.

Implement and manage Exchange Online deployments.

Monitor and troubleshoot Exchange Server 2019.

Secure and maintain Exchange Server 2019.

Prerequisites

Knowledge in extent of the courses which are listed in the bellow sections **Previous Courses** and **Related Courses**

Good understanding of TCP/IP and DNS technologies

Course outline

Overview of Exchange Server 2019

Requirements and deployment options for Exchange Server 2019

Exchange Server 2019 management

Overview of the Exchange 2019 Mailbox server

Configuring Mailbox servers

Exchange Server 2019 recipients

Managing Exchange Server recipients

Configuring address lists and policies

Overview of the Exchange Management Shell

Exchange - implementation

Managing Exchange Server 2019 by using Exchange Management Shell
Managing Exchange Server 2019 by using Exchange Management Shell scripts
Configuring client access services in Exchange Server 2019
Managing client services
Client connectivity and publishing of Exchange Server 2019 services
Configuring Outlook on the web
Configuring mobile messaging on Exchange Server 2019
High availability on Exchange Server 2019
Configuring highly available mailbox databases
Configuring high availability of Client Access services
Implementing Exchange Server 2019 backup
Implementing Exchange Server 2019 recovery
Overview of message transport
Configuring message transport
Managing transport rules
Deploying and managing an Edge Transport server for message security
Implementing an antivirus solution for Exchange Server 2019
Implementing an antispam solution for Exchange Server 2019
Overview of Exchange Online and Office 365
Managing Exchange Online
Implementing the migration to Exchange Online
Monitoring Exchange Server 2019
Troubleshooting Exchange Server 2019
Securing Exchange Server with role-based access control (RBAC)
Configuring audit logging on Exchange Server 2019
Maintaining Exchange Server 2019

Preparation for Microsoft certification

Most Microsoft certification exams do not require students to attend an official MOC course in order to pass the exam.

This applies to all certifications except for MCM

Official Microsoft MOC courses as well as our own GOC courses are good ways of preparation for Microsoft certifications such as MCP, MTA, MCSA, MCSE or MCM

This does not mean that official MOC courses would serve as the only necessary preparation. The primary goal of an MOC course is to provide for sufficient theoretical knowledge and practical experience to effectively work with the related product

MOC courses usually cover most of the topics required by their respective certification exams, but often do not give every topic the same amount of time and emphasis as may be required to completely pass the exam
