

Proxmox VE – Automation

Course code: PVAU

The course guides you through preparing your environment for automation, configuring the automation itself, and applying it to virtual machines (VMs), operating system configuration, and, where applicable, the automation of Proxmox server configuration.

Who is the course for

- System administrators and IT professionals managing virtualized environments
- Server administrators planning to implement automation using the open-source Proxmox platform

What we teach you

- Understand the fundamentals of automation on the Proxmox platform
- Test and validate automation scenarios
- Manage systems and automate deployment and configuration

Course outline

- Automation options and automation environments
- Preparing automation tools
- Preparing the Proxmox VE environment
- Automating Proxmox node configuration
- Automation for VMs and LXC containers
- Deployment instead of migration
