

PRINCE2 Risk Management Practitioner

Course code: PRINCE2RMP

The PRINCE2 Risk Management Practitioner course prepares you to manage risk effectively across projects, programmes, and the wider organisation using the internationally recognised PRINCE2 Risk Management framework, aligned with ISO 31000. You will master the core principles, six risk assessment perspectives, and an eight-process cycle covering the full lifecycle of risk management from identification and response planning through to monitoring and reporting.

Target Audience

- Risk managers and risk specialists who want to deepen their expertise and gain an internationally recognised certification in risk management using the PRINCE2 Risk Management framework.
- Project and programme managers responsible for identifying, assessing, and managing risks at project, programme, or portfolio level.
- PMO managers and consultants who want to introduce or improve a systematic approach to risk management across the organisation.
- Operations managers, change professionals, and HR specialists whose work requires practical knowledge of risk management in a broader organisational context.
- All professionals who need to apply a structured, ISO-aligned approach to risk management applicable across industries and global standards.

What You Will Learn

- Purpose and Context of Risk Management: Understand the fundamentals of risk management, the challenges to effective practice, and how it supports corporate governance and enterprise risk management.
- PRINCE2 Risk Management Integrated Framework: Learn how the PRINCE2 Risk Management integrated framework guides risk management to create and protect value across the organisation.
- PRINCE2 Risk Management Principles: Understand the guiding obligations that are continuously required to create and protect value through effective risk management.
- PRINCE2 Risk Management Perspectives: Learn to assess risks through the lens of the 6 distinct perspectives, enabling decision-makers to create and protect organisational value.
- PRINCE2 Risk Management Process Cycle: Understand the 8 processes designed to ensure the activities for effective risk management are defined, relationships are clear, and techniques and supporting documents are properly applied.
- Identify, Assess, and Respond to Risks: Learn how to identify and assess the most critical risks, plan responses and contingency measures, and monitor, report on, and adapt risk management strategies.

Course Content

- Introduction to PRINCE2 Risk Management: The purpose of risk management, its place in corporate governance, and an overview of the integrated framework in the context of global standards (ISO 31000).
- PRINCE2 Risk Management Principles: The core principles as the foundation for effective risk management - from alignment with organisational values to continual improvement.
- Six Perspectives: The Strategic, Programme, Project, Operational, Product, and Opportunity perspectives as tools for comprehensive risk assessment.
- People, Culture, and Behaviour: The influence of the human factor, organisational culture, and individual behaviour on the effectiveness of risk management in practice.
- Process Cycle - 8 Processes: Identify, Assess, Plan, Implement, Communicate, Evaluate, Learn, and Embed - ensuring a complete and consistent approach to risk management.
- Identifying and Assessing Critical Risks: Techniques for recognising and evaluating the most critical risks and understanding their collective impact on the likelihood of achieving organisational objectives.
- Response and Contingency Planning: How to select and implement the right risk response strategies and determine the appropriate level of contingency reserves.
