

Developing Cloud Native Applications with Microservices Architectures

Course code: D0092

As of January 2026, only in-person Red Hat training is available for purchase under the original terms. Virtual training (VT) courses are offered exclusively as part of the annual RHLS Course subscription can be found here. How to schedule a virtual course in the Red Hat Learning Subscription can be found here. Identify the proper frameworks and tools to build your microservices architecture. Developing Cloud-Native Applications with Microservices Architectures (D0092) is a series of on-demand, online videos that will teach you how to combine different frameworks and tools into a microservices architecture that fits your organizational needs. You've no doubt heard about the microservices architecture, but understanding and executing it can be a bit of a challenge. Through a series of videos, this course will introduce microservices, review multiple microservices frameworks and runtimes, and show you techniques to deploy them through a hassle-free DevOps pipeline. We'll discuss containers, Docker, Spring Boot, NodeJS, .NET, OpenShift, Jenkins, Vert.x, Kubernetes, and much more.

Who is the course for

Java™ developers and anyone interested in OpenShift and Kubernetes

What we teach you

You've no doubt heard about the microservices architecture, but understanding and executing it can be a bit of a challenge. Through a series of videos, this course will introduce microservices, review multiple microservices frameworks and runtimes, and show you techniques to deploy them through a hassle-free DevOps pipeline. We'll discuss containers, Docker, Spring Boot, NodeJS, .NET, OpenShift, Jenkins, Vert.x, Kubernetes, and much more.

Required skills

Understanding of software and IT system architecture

Course outline

Video 1: Deploying Cloud-Native Applications with Microservices Architectures Introduction

Video 2: Microservices Overview: What and Why?

Video 3: API: Building and Deploying a Microservice (and demonstration)

Video 4: Discovery and Invocation (and demonstration)

Video 5: Microservices Patterns (and demonstration)

Video 6: Circuit Breakers (and demonstration)

Video 7: Pipelines (and demonstration)

Video 8: Authentication (and demonstration)

Video 9: Logging, Monitoring, and Tracing (and demonstration)

Video 10: Blue/Green Deployment (and demonstration)

Video 11: Canary Deployment (and demonstration)

Video 12: Moving from Monolith to Microservices
