Prisma Access SSE: Configuration and Deployment

Course code: PAN-PASSECD

The Prisma Access SSE: Configuration and Deployment course introduces you to the operational deployment of Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace the needs of the modern workforce by providing network connectivity and network security services from the cloud.This course will enable you to deploy, configure, maintain, and troubleshoot Prisma Access using Strata Cloud Manager. The course is intended for professionals in cybersecurity and public-cloud security, as well as general network-security professionals who want to learn how to secure remote networks and mobile users.

Who is the course for

This course is intended for Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, and Network Engineers.

What we teach you

Successful completion of this four-day, instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation.
In a lab environment, you will get hands-on experience configuring, managing, and troubleshooting Prisma Access via Strata Cloud Manager.

Required skills

Participants should have a basic knowledge of cloud computing and the public cloud and experience with networking concepts, including routing, switching, and IP addressing.
In addition, participants should complete the following pre-requisites to be optimally prepared for the course:

- Prisma Access (Strata Cloud Manager) digital learning paths
- (Recommended) Firewall Essentials: Configuration and Management or equivalent experience.

Course outline

- Prisma SASE
- Prisma Access Architecture
- Strata Cloud Manager
- Licensing and Activation
- Service Connections
- Remote Networks
- Mobile Users
- Prisma Access Explicit Proxy
- ZTNA Connector
- Prisma Access Browser
- Autonomous Digital Experience Management (ADEM)
