Preparation for the BPM Certified Expert (BPM/OCEB2) Fundamental Certification Exam

Course code: GOC4625

The course is intended for those interested in obtaining the OMG Certified Expert in BPM™ 2 Fundamental certificate (OCEB 2, also known as BPM certification). Its content fully corresponds to the individual requirements for the exam. OCEB 2 Fundamental is the initial certification level, which is followed by the Intermediate and Advanced levels.
It is important to note that this certification covers the entire discipline of process management (Business Process Management). The exam therefore does not only examine modeling in BPMN notation itself, but also broader managerial and organizational contexts.
Candidates interested in certification often assume that it tests exclusively BPMN. However, the OMG organization does not provide a separate exam focused purely on this notation. Therefore, our course will comprehensively and clearly guide you through all the necessary overlaps that the exam requires.

Who is the course for

- Experienced business and process analysts
- , especially in the field of process management and process automation, who need to consolidate the theoretical framework and obtain formal certification.
- Process owners
- and
- managers responsible for process management
- , who want to formally confirm their knowledge and obtain an internationally recognized certificate in the field of process management and automation.
- Managers considering the transition to a
- process-driven organization
- looking for proven approaches and standards.
- Business and solution architects
- responsible for projects optimizing and automating processes.
- Other analysts
- , who primarily encounter process changes in organizations and want to better understand the overall context of BPM.

What we will teach you

- Introduce and explain all areas necessary for successful completion of the OCEB 2 certification exam.
- Practice typical test questions, analyze the correct answers together, and understand the logic on which the certification is based.

Required entry knowledge

- Interest in process management issues.
- Practical experience with BPMN 2 at the GOC270 training level.
- Ability to perceive processes in a broader business context with a reasonable distance from a purely technological (IT) solution.

Course Outline

The training outline corresponds to the exam requirements:

- Business Process Modeling Concepts
- Fundamentals
- Strategy
- Goal Setting and Planning
- Project Management
- Marketing
- Business Motivation Modeling
