Who is the course for

This course is specifically designed for Advanced Certified Product Owners (A-CSPO) who have at least two years of experience in the Product Owner role. Come prepared to share your knowledge and experience and learn from the experiences of your peers and the facilitator.

It's designed for Product Owners who are looking to expand their product ownership skills beyond one team and backlog.

Join the training led by the author of the popular books *The Great ScrumMaster: #ScrumMasterWay*, *The Agile Leader: Leveraging the Power of Influence*, and *Agilní metody řízení projektů* (in Czech) and get hands-on experiences on how to enhance your career as the great Product Owner.

What we teach you

"Great Product Owners know how to effectively communicate with customers, prioritize the Backlog and define the strategy, business plan, and product goals."

It's not any boring PowerPoint class, it's an interactive training based on practicing tools for Backlog Refinement, roadmaps, and creating business models. It is full of simulations, conversations, and sharing of real experiences. You will meet experienced people who are on the great ScrumMaster journey, you find friends who will support you even after the class, as the class is just the beginning and the participants will organize coaching circles to support each other and enhance their learning.

The class is part of the Great ScrumMaster Academy Program. The class is trained by Scrum Alliance certified trainer CST and I'm sure you will enjoy it.

Being a great Product Owner is a journey. As part of the course, we build on your agile mindset and experience with Scrum, which we will develop and deepen so that you can successfully manage products, build a backlog, and prioritize requirements. CSP-PO candidates are expected to challenge their teams to improve the way Scrum and Agile are implemented. They have experience, knowledge, and a proven understanding of Agile, Scrum, and Product Ownership. The 2 days workshop is practical training in Agile product ownership techniques on situations brought by participants.

You will work in self-organizing teams, supporting each other on your journey, sharing experiences and hints.

Certified Scrum Professional: Product Owner kurz

- Advanced Stakeholder Discussion
- Launching Scrum Teams
- Product Ownership with Multiple Teams
- Market-Driven Product Strategy Practices
- Complex Product Planning and Forecasting
- Product Economics
- Advanced Interactions with Customers and Users
- Complex Product Assumption Validation
- Advanced Product Backlog Management

Required skills

Anyone is welcome to take this course, however, pre-requisites to receive your Certified Scrum Professional Product Owner Certification (CSP-PO) are:

BEFORE THE CLASS:

- Do the pre-class preparation (depending on your experience and knowledge anything between a few hours and a few days).

DURING THE CLASS:

- Demonstrate your readiness of the CSP-PO learning objectives during practical simulations, which are going to be validated by the trainer.

ADDITIONAL TO GET CERTIFICATION:

- Have at least two year of work experience specific to the Product Owner role logged it at your Scrum Alliance profile (within the past five years).
- Hold an active Advanced Certified Scrum Product Owner (A-CSPO) certification with the Scrum Alliance.

NOTE: You may take the CSP-PO course at any time after completing your A-CSPO certification, but must have at least 24 months of Product Owner experience logged into your Scrum Alliance profile before you can receive your CSP-PO certification.

While this class may be taken by anyone, the CSP-PO will not be issued until all of the above listed criteria are met.

Course outline

The CSP-PO agenda is defined by the Learning Objectives which fall into the following categories:

- Product Owner Core Competencies
- Implementing Goal Setting and Planning
- Advanced Interactions with Customers and Users
- Complex Product Assumption Validation
- Advanced Product Backlog Management

To get the most out of the two days, make sure you reviewed the CSP-PO Learning Objectives before the class and are ready to identify areas where you need to focus.
