

Microsoft PowerPoint – Creating a corporate template

Course code: MSPW3

An essential tool for ensuring a uniform corporate design in PowerPoint environment, which is consistent with the graphic manual (company visuals) is a template (POTX, POT). This seminar aims to familiarize participants with the specifics of template creation and prepare them for the problems which in practice may encounter. More than training it is practical workshop (hands-on-lab, ...), which is thematically based on the training MSPW2, but unlike these general training is focused specifically on the issue of preparation of templates and related aspects. The result of the seminar is easy to use, well-defined template, with proper built-in layouts, correct color scheme. In the workshop we will also touch on solving conflict situations, template distribution or usage of a new template to an existing presentations using old template or local formatting. Training does not depend on the Powerpoint version, all demonstrations will take place on version 2019.
