Course terms

Date	Durat	ion Course price	Туре	Course language	Location
05.02.2026	2	440 €	Online	CZ/SK	Online
07.04.2026	2	11 000 Kč	Presence	CZ/SK	GOPAS Praha
06.05.2026	2	440 €	Presence	CZ/SK	GOPAS Bratislava

The prices are without VAT.

Who the course is for:

- Work with the latest features in PHP.
- Use PHP standards.
- Use MVC architecture.
- Use existing libraries and API.
- Work effectively in the IDE.
- Handle large XML and JSON use.
- Secure Web applications.
- Using versioning, logging and profiling applications

Required skills:

- Knowledge of object oriented programming in PHP at least at the rate INTPH_00P classes, objects, interfaces, composition, inheritance, visibility (private / protected / public).
- Experience with the development and maintenance of applications in PHP.

Teaching methods:

- Professional explanation with practical samples and examples.

Teaching materials:

- Powerpoint handouts and module printouts.

Course syllabus:

News in recent versions of PHP

- What version of PHP use.
- Namespaces.
- Anonymous functions, closures
- PHP 7

Development environment

- Effective work with code shortcuts, refactoring.

Advanced Programming in PHP

- Debugging - xdebug.

Using existing libraries

- Installation using the Composer
- Presentation of selected libraries.

The MVC architecture

- What's MVC.
- Using the MVC.

PHP standards - PSR

- PSR-0, SG-1, SG-2, SG-4

Safety

- Safe handling passwords and other sensitive information.
- Prevention of common vulnerabilities Cross-site scripting (XSS), CSRF (cross-site request forgery), SQL Injection (SQLite).

XML/JS0N

- Processing of large XML.
- Acquisition of data in JSON in communication with the API. Processing of data from JSON.

Testino

- Introduction into testing.

Operation applications

- Versioning code.
- Processing and logging errors.
- Application profiling.
