

Introduction to Solid.js framework

Course code: JS_SOLID1

This course is designed for intermediate JS programmers who want to learn how to create front-end applications using the SolidJS framework. Participants will learn about presenting data, working with forms, and communicating with the backend, all using the components, signals, and effects provided by the SolidJS library. The course assumes knowledge of the DOM object model in the browser at the course level [JS_DOM1] and moderately advanced knowledge of JavaScript at the course level [JS_PROG2].

Affiliate	Duration	Course price	ITB
Praha	3	15 300 Kč	30
Brno	3	15 300 Kč	30
Bratislava	3	612 €	30

The prices are without VAT.

Course terms

Date	Duration	Course price	Type	Course language	Location
 13.04.2026	3	15 300 Kč	Telepresence	CZ/SK	GOPAS Praha
 13.04.2026	3	612 €	Telepresence	CZ/SK	GOPAS Bratislava
 13.04.2026	3	15 300 Kč	Telepresence	CZ/SK	GOPAS Brno

The prices are without VAT.

For whom the course is intended

- This course is designed for intermediate JS programmers

What we will teach you

- Build a simple SOLID application
- Make application components work together and share state
- Use signals, effects and memes
- Interact with the user
- Interact with the backend.

Required input knowledge

- JavaScript at course level [JS_PROG2]
- Course-level knowledge of how the DOM works in a browser [JS_DOM1]

Course outline

Introduction

- What is solid
- Development environment
- Hello World
- Project structure

Data presentation

- Show
- Switch / Match
- Dynamic
- For
- Index

Introduction to Solid.js framework

- Portal
- CSS styles and classes

Components

- Component targeting
- Lifecycles
- Collaboration and state sharing

Events, signals and status management

- Interaction with the user
- Signals
- Derived signals
- Effects
- Mema
- Store

Backend communication and asynchronous functions
