# WebSphere Application Server V9 Administration

Course code: WA590G

This course teaches you the skills that are needed to administer IBM WebSphere Application Server V9.This release of IBM WebSphere Application Server provides enhanced support for standards (notably Java 7 EE), emerging technology, and a choice of development frameworks.In this course, you learn how to configure and maintain IBM WebSphere Application Server V9 in a single-server environment. You learn how to deploy enterprise Java applications in a single computer configuration. In addition, you learn how to work with features of WebSphere Application Server V9, such as the wsadmin scripting interface, security, and performance monitoring.

| Affiliate | Duration | Course price | ITB |

## Who is the course for

This course is designed for administrators who configure and manage web-based applications on WebSphere

Application Server. Web administrators, application developers and deployers, security specialists, and application

architects can also benefit from this course.

## What we teach you

After completing this course, you should be able to:
- Relate WebSphere Application Server to the WebSphere family of products
- Describe the features and standards in WebSphere Application Server V9
- Describe the use of WebSphere Application Server in cloud, hybrid cloud, and on-premises environments
- Describe the architectural concepts that are related to WebSphere Application Server
- Assemble and install server-side Java enterprise applications
- Use WebSphere administrative tools to configure and manage enterprise applications
- Use wsadmin scripting
- Configure WebSphere Application Server security
- View performance information about server and application components
- Troubleshoot problems by using problem determination tools and log files

## Required skills
- Basic operational skills for the Linux operating system
- Administrative skills for a web server, such as IBM HTTP Server or Apache

**GOPAS**®

19/01/2026 21:39:23

- Basic understanding of cloud concepts, private, public, and hybrid clouds, and traditional on-premises environments

## Course outline

- Course introduction
- WebSphere product family overview
- WebSphere Application Server architecture - stand-alone
- Exercise: Profile creation
- WebSphere Application Server administrative console
- Exercise: Exploring the administrative console
- Introduction to the PlantsByWebSphere application
- Application assembly
- Exercise: Assembling an application Application installation
- Exercise: Installing an application
- Problem determination
- Exercise: Problem determination Introduction to wsadmin and scripting
- Exercise: Using wsadmin WebSphere security
- Exercise: Configuring WebSphere Application Server security
- Exercise: Configuring application security Performance monitoring
- Exercise: Using the performance monitoring tools
- Course summary
