

# Introducing Flowmon Technology

Course code: FLOWMON

This course provides information about Flowmon technology for monitoring the performance and security of your network. It is the first course which familiarized students with the basic work with this software. There is an overview of the functions of Flowmon technology.

| Affiliate  | Duration | Course price | ITB |
|------------|----------|--------------|-----|
| Praha      | 1        | 1 500 Kč     | 0   |
| Bratislava | 1        | 70 €         | 0   |

The prices are without VAT.

## Course terms

| Date | Duration | Course price | Type | Course language | Location |
|------|----------|--------------|------|-----------------|----------|
|------|----------|--------------|------|-----------------|----------|

The prices are without VAT.

## Training format

As a standard, we implement a full-time course (onsite or ILT \*) in the ALEF Training Center. Upon agreement, it is possible to implement the course at the client's premises. The course can also be implemented online (vILT \*\*) via a video conferencing platform - Cisco Webex meetings. Instructor-led virtual training is a combination of the best of a traditional classroom course and interactive training without having to leave your own office or the comfort of your home. Convince yourself of top quality transmission, video calls and effective team collaboration.

Explanations:

- ILT - Instructor Led-Training \* - instructor-led training in the classroom. \*\* vILT (Virtual Instructor-Led Training) - this is a form of distance learning, where the instructor conducts training from the classroom through an online platform to which students connect from their offices or the comfort of their home.

## Required skills

TCP/IP, and the experience with the operation of networks.

## Teaching materials

Participants will receive access to an electronic version of the study materials.

## Course outline

- Overview - What is Flowmon?
- New Features in Flowmon technology
- Flowmon installation and requirements
- Basic settings
- Monitoring flows and network metrics
- Network anomaly monitoring - ADS module
- Application performance measurement - APM module
- Traffic capture and analysis - FPI module
- Protection against volumetric DDoS attacks - DDD module
- Storing NAT information for ISP-DR solutions
