

User Data and Privacy Protection

Course code: GOC51

Do you want to keep all your personal data private and confidential make sure your confidential communication stays confidential? Do you want to prevent data leaking in case of loss or theft of your computers or storage media? Are you looking for protection against interception of telecommunication traffic without giving up the benefits of modern communication? Then we have a unique training opportunity for you with our best security trainer who will explain how to implement correct security procedures so that you can get secure against NSA, industrial espionage or even police commando that will burst into the company and confiscate all your IT equipment. During this practical two-day course you will see that implementation of security measurements is not particularly difficult. You can try all the procedures during practical demonstrations in real environment.
