Who is the course for

This course is designed for technical professionals who support a Check Point Virtual Security Extension (VSX) solution within their network security environment.

It is also recommended for candidates who are preparing for the Check Point Certified Virtual System Extension Specialist (CCVS) certification exam.

What we teach you

- Explain how to use the VSX Provisioning Tool to add and remove virtual devices.
- Explain how to employ tools to optimize resources allocated in a VSX environment.
- Identify various VSX command line tools commonly used to retrieve information and perform configuration changes.
- Explain how to use VSX utility commands to perform various maintenance tasks for the VSX environment.
- Explain how to troubleshoot and debug issues that occur in a VSX environment.

Required skills

Solid knowledge of the following:

- Unix-like and/or Windows OS
- Internet
- Networking Fundamentals
- Networking Security
- TCP/IP Networking

Check Point training/certification:

- Check Point Certified System Administrator (CCSA)
- Check Point Certified Security Expert (CCSE)

Useful but not required:

- Check Point Jump Start Maestro Hyperscale
- Network Security
- Check Point Maestro Expert (CCME)
- Check Point Certified Multi-Domain Security Management Specialist (CCMS)
