

Microsoft Product License Terms

Course code: MPL1

A basic two-day course in which you will get to know in detail the licensing conditions of Microsoft products, whether it is desktop operating systems, applications, server products, but also online services, including licensing of hybrid environments. The training also includes orientation in license documents and contracts, you will learn where to look for these documents, how to navigate in them and how to interpret them correctly. As part of the training, you will be part of a mock software audit and learn how to properly record software licenses based on its requirements and how to use tools to do so, including tools provided by Microsoft, to make passing the real audit a breeze. All your licensing questions that you bring with you will also be answered.
