Who is the course for

- Developers and users who want to learn how to use advanced SQL techniques and methods

After completing this course, students will be able to use new features in these areas:

- MySQL overview
- Use advanced techniques with the SELECT statement
- Use subqueries
- Overview and use the advanced features
- Advanced techniques of SQL language

Required skills

- Basic knowledge of IT and PC
- Knowledge of SQL in MySQL

Course Outline

MySQL overview

- Overview of the MySQL database system
- The installation procedure
- MySQL Tools

Advanced techniques with the SELECT statement

- Advanced operators
- Regular Expressions

Advanced SQL in MySQL

- LIMIT
- Practical examples

Subqueries

- Reason for using subqueries
- Stand-alone subqueries
- Correlated subqueries
- Subquery Operators (EXISTS, IN, ANY, ALL)

Overview and use the advanced features

- Functions for working with different data types
- Conversion of data types
- Metadata function
- Working with XML
- Advanced aggregation techniques

Advanced techniques of SQL language

- Working with hierarchical data structures and recursion
- Advanced techniques of joining data sources
- Action queries
- Advanced subqueries and operators
