# ICP-AHR - Certifikace Agilní HR

- How to work with motivation, responsibility, and ownership,
- Supporting learning culture and help people grow,
- Create an engaging career for the employees: a new way to a career path and position scheme,
- Share practical tips on how to change the way of working.

The course is not an overview of legal regulations and governance principles, but it helps HR to reorient and become leaders of agile transformation. If you really want to change the corporate culture and move the company towards an agile organization, you can't stop at the border of the IT department. Other departments need to operate on the same wave. This includes HR (Human Resources). This does not seem to be a big change on a first look. Even in an Agile organization, HR must help with finding and hiring employees, training, developing people, etc., but suddenly we do not focus on individuals and their specialization, but on strengthening teamwork and cooperation. The whole system is actually changing, where Agile HR is here for its customers, the employees (of all levels), supporting them to be successful in their job.
