Who is the course for

The course is intended for programmers, testers and project leaders who want to learn about C and C++.

What we teach you

Fundamentals of programming in C and language syntax

Data types, operators and expressions

How to indicators, dynamic structures

How to use standard libraries

Fundamentals of object-oriented programming

Abstract classes, inheritance, polymorphic structures

Designing event-driven programmes

Required skills

Basic knowledge of algorithmization and programming

PC use skills

Course Outline

Introducing to C/C++ programming

- Architectural overview
- Structure of program in C/C++
