

Cybersecurity Incident Management - Tabletop Exercise

Course code: GOC251

In this one-day course, we will walk participants through the individual steps of detecting, managing, resolving, reporting and evaluating cyber security incidents using practical examples from small and large corporate environments. The course is conducted in a table-top exercise style, meaning the lecturer presents questions that arise in a hypothetical cyber incident situation and, together with the participants, considers options for how to proceed. The aim is for the participants to actually realize and justify what is appropriate to do in the individual phases and what mistakes to avoid before a cyber incident even occurs.
