Implement and manage external identities

Implement and manage hybrid identity

Secure Azure AD user with MFA

Manage user authentication

Plan, implement, and administer conditional access

Manage Azure AD identity protection

Plan and design the integration of enterprise for SSO

Implement and monitor the integration of enterprise apps for SSO

Implement app registration

Plan and implement entitlement management

Plan, implement, and manage access reviews

Plan and implement privileged access

Monitor and maintain Azure AD

Preparation for Microsoft certification

Most Microsoft certification exams do not require students to attend an official MOC course in order to pass the exam.

This applies to all certifications except for MCM

Official Microsoft MOC courses as well as our own GOC courses are good ways of preparation for Microsoft certifications such as MCP, MTA, MCSA, MCSE or MCM

This does not mean that official MOC courses would serve as the only necessary praparation. The primary goal of an MOC course is to provide for sufficient theoretical knowledge and practical experience to effectively work with the related product

MOC courses usually cover most of the topics required by their respective certification exams, but often do not give every topic the same amount of time and emphassis as may be required to completelly pass the exam
