

Microsoft Excel – In Practice – Workshop

Course code: MSEX2W

The course teaches users who already know the basics of working with spreadsheets how to make full use of its capabilities and create documents containing tables and charts to a professional standard. Participants are expected to have skills corresponding to Microsoft Excel – basic course. This course contains much more practical application of the subject and you will get more examples to try out. This course is suitable for users of every version of Microsoft Office products. Excel is a well-matured application and control of its interface has not changed significantly since the 2007 version. There will be 3 latest Excel versions installed in each classroom in case the users would like to work with the version they are accustomed to. The student's books of appropriate versions will also be available.
