

Theoretical Introduction to Agile and Scrum process

Course code: SCRUM0

In this course you will learn basic information about agile project management methods. We will focus on the acquisition of general knowledge about the Scrum process, its principles, aspects of individual roles in Scrum and used artifacts. Comparing this information with traditional project management procedures. Knowledge gained on the course will be a good basis for continuing training "Agile and Scrum Process - Practical Implementation", or any certification "CSM - Certified Scrum Master".
