

Microsoft Project Online – multiple projects management

Course code: MSPR020L

Can you work with MS Project and would you like to have projects in the cloud? With Project Online you can have all projects in one place, track their progress, costs. You can plan resources across all projects, track their utilization and remaining capacity. You can work with projects with the MS Project Desktop client and use all the advanced functionalities of this extended project planning program or with a browser on a mobile or tablet. In addition, there are reports with the most important information from all projects, with which you can work directly in MS Excel. Project Online is an extension of MS Office 365 plans and thanks to the integration with SharePoint Online you can have all project documents, a list of risks and problems in a single structure.
