What we teach you

During this CISA training course, delegates will be exposed to the Five Domains of Information Security Auditing. These domains comprise the foundations of CISA and it is imperative that delegates grasp a complete understanding of these aspects in order to pass the CISA exam and use their certification within the workplace. Within each of these domains exists multiple topics, which when combined, provide a comprehensive overview of the domain of focus. Due to the breadth of information imparted with each topic over a period of just four days, this course is considered intensive and candidates must study hard to obtain the certification.

The five domains are as follows:

- The Process of Auditing Information Systems
- Governance &Management of IT
- Information Systems Acquisition, Development, and Implementation
- Information Systems Operations, Maintenance, and Support
- Protection of Information Assets

The CISA essential for professionals dealing with controlling, monitoring, and assessing an organisation's information technology and business systems. This includes:

- IS/IT auditors/consultants
- IT compliance managers
- Chief Compliance Officers
- Chief risk &privacy officers
- Security heads/directors
- Security managers/architects

The above list is a suggestion only; individuals may wish to attend based on their own career aspirations, personal goals or objectives. Delegates may take as few or as many Intermediate qualifications as they require, and to suit their needs.

Required skills

There are no prerequisites to learn CISA from this tutorial. However, to get the CISA certification you need to:

- Pass the CISA examination
- Submit an application for CISA certification
- Adhere to the Code of Professional Ethics
- Dedicate to the Continuing Professional Education Program
- Compliance with the Information Systems Auditing Standards

The examination is open to all individuals who have an interest in information systems audit, control, and security. A minimum of 5 years of professional information systems auditing, control or security work experience is required for the CISA certification.

This training course is not suitable for beginners. It is required that delegates possess at least five years of exposure in the field of Information Systems Auditing. With this information in mind, it is expected that CISA qualified candidates have an outstanding level of professional experience, commitment, and extensive knowledge of IS Auditing. Thus, a CISA qualification is likely to open many doors and propel certified individuals into a high ranking position within the enterprise.

Please note: This exam is sat separately from the course. Delegates must book the exam directly from ISACA.

Course outline
