

CISSP - Certified Information Systems Security Professional

Course code: CISSP

The five-day course supports preparation for the Certified Information Systems Security Professional (CISSP, ISC2) exam and introduces attendees to all eight critical domains and the necessary IT security terminology to understand the exam questions. Due to the breadth and complexity of the topics, the training is extended until approximately 5:00–5:30 PM. If you have already attended the SSCP course, please be aware that this training covers approximately 80% of the same content. Therefore, consider that a significant portion of the course may be just review for you.

Affiliate	Duration	Course price	ITB
Praha	5	59 400 Kč	75
Brno	5	59 400 Kč	75
Bratislava	5	2 200 €	75

The prices are without VAT.

Who is the course for

This training is intended as an entry into the topics of information security. It can also be understood as a recapitulation of the terms and infosec principles before undertaking the CISSP exam. The course is a very fast paced preparation for the CISSP exam. Some topics will be new for some of the students. Some others will be just a recap for them. The training could be understood as a kick-off fast intro into the infosec problems or a recap and hint on what one does not know well yet for others who are more experienced in the field. Student groups usually vary widely which provides for interesting discussions and knowledge sharing among them.

Teaching methods

We are going fast through the hundreds of the infosec terms, principles and problems so that the students get overall understanding of what security means in whole. We are also going through some sample questions in order kick-off
